KRAFFE - DIMI

ABOUT US

KRAFFE - DIMI

Founded in 2022, **Kraffe Roasters** is an innovative venture led by a team of seasoned engineers and industry professionals with over a decade of expertise in coffee roasting machinery.

At the forefront of **Kraffe Roasters** is the founder and chief engineer of a renowned coffee roasting machine brand. With a deep understanding of machine design and industry demands, the Kraffe Roasters project was established to set new standards in roasting consistency and customer support.

Unlike other brands where key features are optional, **Kraffe Roasters** integrates them as standard, ensuring superior performance and reliability. These features are detailed in the following sections.

Our Core Values: *Durability, Consistency, Speed*

- **Durability**: **Kraffe Roasters** machines are built to last, utilizing high-quality materials and a rigorous quality assurance process. Every machine undergoes comprehensive testing, including two successful roasting cycles before approval. Additionally, all components are sourced from globally recognized European brands, establishing a new benchmark for manufacturing excellence.
- **Consistency**: Our roasters deliver uniform results across every roast, ensuring precision at every stage. With advanced insulation, precise variable controls, and cutting-edge technology, **Kraffe Roasters** guarantees repeatable outcomes across all models and batches.
- **Speed**: **Kraffe Roasters** is committed to providing the fastest aftersales support in the industry. We guarantee responses to customer inquiries within 24 hours, with 24/7 direct access to quality assurance engineers—bypassing traditional sales channels. Understanding that every minute counts for roasteries, we prioritize prompt and efficient support.

With its unwavering commitment to quality, precision, and service, **Kraffe Roasters** is redefining standards in the coffee roasting industry.

GENERAL FEATURES

MODULATED PREMIX BURNER

AUTOMATIC PROFILE ROASTING

KRAFFE - DIMI

WELL INSULATED BODY

7" TOUCHSCREEN

**3rd PARTY SOFTWARE
COMPATIBILITY**

FULL CONTROL OVER ROASTING

**EUROPEAN BRANDED
COMPONENTS**

CONSISTENCY & DURABILITY

**EASY INSTALLATION &
MAINTENANCE**

TAILORED PRODUCTION

GENERAL FEATURES

KRAFFE - DIMI

Modulated Premix Burner for Precise Roasting :

The premix burner provides the most efficient and precise solution for the coffee roasting process. Achieving accurate flame control is essential for consistent results, ensuring optimal roast quality. Additionally, its efficient gas consumption not only helps reduce operational costs but also makes it an environmentally friendly choice for roasters, minimizing your carbon footprint.

7-Inch Touchscreen Control for Seamless Operation :

All Kraffe Roasters are equipped with a 7-inch touchscreen control panel, offering an intuitive and user-friendly interface. Designed for efficiency and ease of use, it allows operators to monitor and control the roasting process with precision and convenience.

Automatic Profile Roasting with Third-Party Software Integration :

Kraffe Roasters are compatible with third-party software, allowing the use of automation features from various platforms for automatic profile roasting. This integration enables precise and efficient control during the roasting process, enhancing the overall roasting experience and optimizing results. This capability offers users the advantage of utilizing programs they are already comfortable with, ensuring a seamless transition and streamlined operation.

GENERAL FEATURES

KRAFFE - DIMI

Easy Installation & Maintenance for User-Friendly Operation:

Kraffe Roasters machines are designed for user convenience, featuring a straightforward installation process with plug-and-play components and effortless maintenance, allowing for quick disassembly and cleaning to ensure long-lasting performance.

Well Insulated Body for Enhanced Efficiency:

With its well-insulated body, Kraffe Roasters are designed to operate at high temperatures while minimizing heat loss. This insulation improves overall efficiency, ensuring that energy is utilized effectively during the coffee roasting process.

Consistency and Durability in Every Roast:

With its well-insulated body, precise variable control, and 3mm-sensitive thermocouples, Kraffe Roasters enable you to achieve consistent results with every roast. These advanced features not only ensure optimal heat management and accurate monitoring but also contribute to the durability of the machines, allowing for superior roast quality and long-lasting performance in each batch.

Tailored for Your Coffee Shop Design :

Kraffe Roasters provides a wide range of color options at no additional cost. Furthermore, if you have space constraints, Kraffe Roasters can customize the machine to fit your specific coffee shop design requirements.

TECHNICAL FEATURES

KRAFFE - DIMI

BATCH CAPACITY

**250-500
gr**

ROASTING TIME

7-11 min

COOLING TIME

3-4 min

BURNER CAPACITY

18 kW/h

TOUCHSCREEN DISPLAY

7"

OPERATING TYPE

Auto

POWER REQUIREMENT

400 W/h

SUPPLY VOLTAGE (V)

220/380

GAS CONSUMPTION (m3/h)

0,07/0,58

KRAFFE ROASTERS 7" Touchscreen Features

KRAFFE - DIMI

Pre-Heat Function:

The machine automatically reaches a user-defined pre-set temperature, triggers an alarm upon achieving that temperature, and remains idle at the set temperature for a user-defined duration.

End Day Function:

The machine autonomously cools down to a user-defined set temperature.

Real-Time Temperature Display:

Provides real-time readings of bean temperature, exhaust temperature, and ambient temperature.

Crack Value Logging:

Enables the saving of start and end values for both the first and second crack.

Auto Cooling Mode:

Automatically activates the cooling tray at the end of the roast based on user-defined settings.

PC Connectivity:

Allows connection to a PC for control via third-party software. The touchscreen is disabled while in PC mode, enabling automation features.

Automatic Indication of Critical Roasting Values :

Provides notifications of key roasting milestones, including the start, end, and turning point.

Automatic Indication of Critical Roasting Values : Provides notifications of key roasting milestones, including the start, end, and turning point.

Flame Indicator:

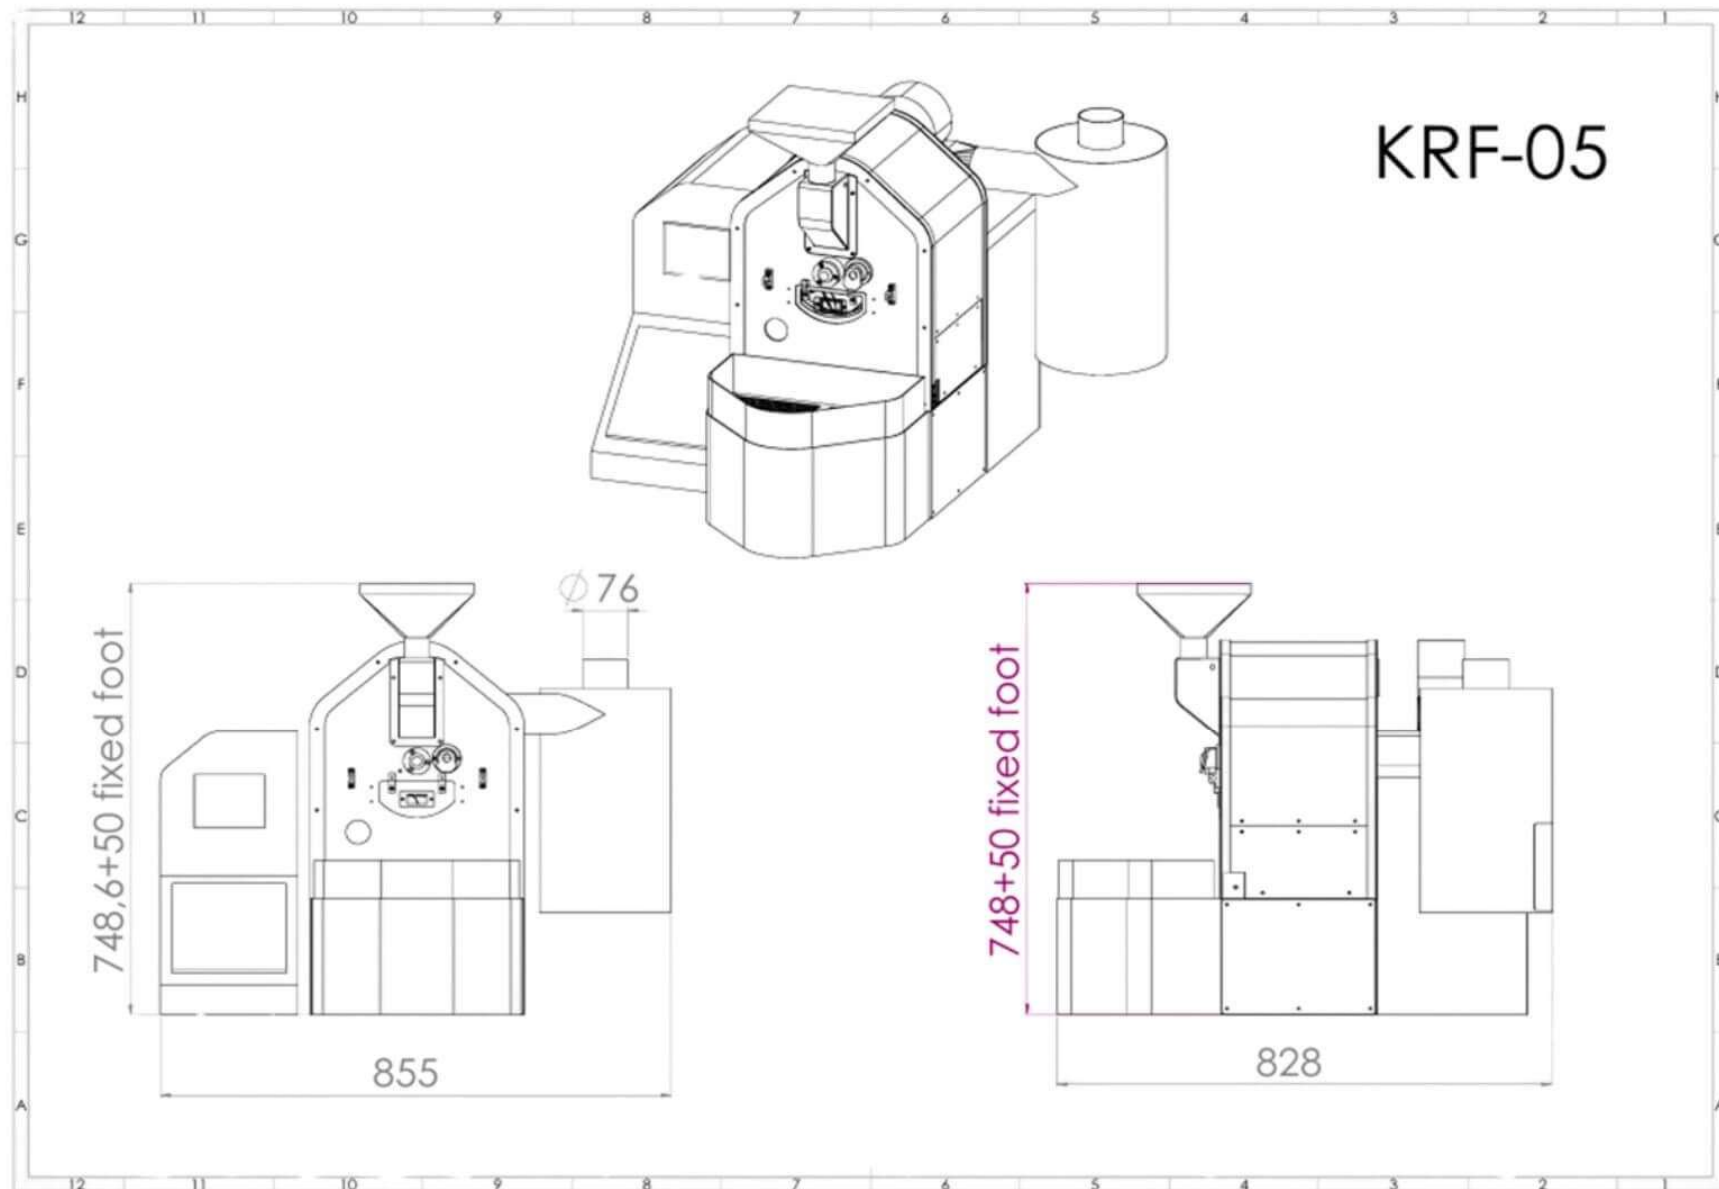

Displays the status of the flame as active or inactive

Status Indicator:

Shows the current operational status, such as pre-heat, roasting, and end-day..

LAY-OUT

KRAFFE - DIMI

WARRANTY TERMS

KRAFFE - DIMI

All Kraffe Roasters products come with a two-year warranty for mechanical components and a one-year warranty for electrical components.

Warranty Coverage

The warranty covers the first failure of any component and will include a replacement at no charge, provided the failure is not due to user error. For any subsequent failure of the same component, a replacement will be provided with an invoice issued to the customer.

Installation by Kraffe Roasters Supervisor

If installation is performed by a Kraffe Roasters supervisor, the following terms apply:

- Accommodation expenses will be covered by Kraffe Roasters, while travel expenses will be the responsibility of the customer during the first year.
- For the second year, all expenses will be borne by the customer, although no service fee will be charged.
- For subsequent years, installation fees will apply, with all travel and accommodation expenses the responsibility of the customer.

Installation by the Customer

If the installation is conducted by the customer, the following terms will apply:

- All expenses will be the responsibility of the customer during the first year, with no service fee charged.
- For subsequent years, installation fees will apply, and all travel and accommodation expenses will be the responsibility of the customer.

Kraffe Roasters is committed to providing online support at any time, free of charge, to assist our customers with their needs.
